

## **WHAT DO I NEED TO PRODUCE A SUCCESSFUL FOAM PARTY FOR MY BUSINESS?**

The first (and most important) thing for a successful foam rental party is a **foam machine** and an excellent place to put it. The only other element you absolutely need for a successful foam party is people who want to have fun and get messy! You'll want to give your guests instructions about the dress code of your party — we recommend that your guests wear rubber-soled shoes and casual clothing or swimwear that they don't mind getting wet — as well as setting up a safe place for them to put their electronic devices (such as cell phones). See our list of foam party tips and tricks for more tips on having a foam rental party.

## **WHERE SHOULD WE HOLD THE FOAM PARTY?**

Hard surfaces such as a concrete patio area are ideal for an outdoor foam party. The concrete will be less slippery than grass, and any liquid will eventually evaporate on its own. You can also set out a plastic tarp to make a foam pit on the grass.

It would be best to place the foam machine on an easy-to-clean surface for indoor foam parties, such as tile or linoleum. Because the floor will get wet, it's best to avoid holding your foam party on a wood floor or carpeting.

## **HOW MESSY IS A FOAM PARTY?**

With a foam rental party, your guests will definitely get wet! Our foam solution naturally evaporates into the air if you have an outdoor foam party.

## **WILL THE FOAM CAUSE YOU TO SLIP?**

Foam is about as slippery as water, so it's possible to slip if you're on long grass or a smooth, glossy surface such as glazed tile. To prevent slipping, we recommend guests avoid running in foamy areas.

## **WILL THE FLOOR GET WET FROM THE FOAM MACHINE?**

Since you need water to generate foam, you can expect the floor to get wet as the bubbles dissolve. The resulting liquid is easy to clean up and doesn't have any lasting effects. If you're hosting a foam party outside, any lingering liquid should eventually evaporate on its own.

## **HOW LONG DOES FOAM LAST?**

When left alone, foam lasts several hours. However, once guests interact with it, the bubbles start to pop and break up. The more people play in the foam, the quicker it will dissolve.

## **IS THE FOAM SAFE FOR CONTACT WITH SKIN AND EYES?**

Our foam solution is non-toxic and environmentally friendly, so there shouldn't be any irritation if it contacts your skin or eyes. Even kids should be fine playing in the bubbles.

## **WHAT KIND OF EVENTS ARE BEST FOR FOAM MACHINES?**

You can use foam machines at a variety of events:

- Birthday parties

- Night clubs
- Dance parties
- Festivals

## **WHAT IS A FOAM PARTY?**

A foam party is a one-of-a-kind event where guests can dance, play, and have fun with sudsy, bubbly foam that's several feet deep. Often hosted outside or in a spacious indoor venue, foam parties are an incredible experience for kids and adults alike!

## **WHAT IS A FOAM MACHINE?**

A **foam machine** is a piece of motorized equipment that produces the foam for a foam party, using a specialized solution. There are various types of foam machines, ranging from compact models to extra-large cannons.

## **IS THE FOAM MACHINE SOLUTION SAFE?**

Yes, the foam solution is bio-degradable, non-toxic, non-staining hypoallergenic. This is completely safe for kids and adults. MSDS can be provided upon request.
